Resumo

My years of experience working at Outback have given me a new perspective on challenges and problems. Always focus on the solution and not on the problem, I learned a lot about working with people, I made many friends, clients that still remind us how good it is to meet new people and cultures.

I'm a passionate Software Engineer with a focus on Front-end Development. Here's a snapshot of what I'm up to:

Currently working on: Front-end Development

Tech stack: JavaScript and TypeScript in Angular

Previous experience: Mainframe with Natural Language, Java with AWS Lambdas, and serverless, Outsystems

Academic Pursuit: Studying to be a Software Engineer

Additional Focus: Actively exploring Agile methodologies and Scrum practices alongside my academic journey

I believe in continuous learning and growth. Feel free to explore my repositories, and let's connect to discuss anything from code to agile methodologies!

Experiência

Avanade

1 ano 6 meses

Front-End Developer / Analista Jr

junho de 2023 - Present (8 meses)

Associate Full-Stack Developer

agosto de 2022 - junho de 2023 (11 meses)
